sustainable
food practices

In the making: A national Food Policy Council for Luxembourg

- Achieve food **sovereignty**
 - by collaboratively setting up a food **policy**
 - with the participative tools of food **democracy**
- **Independent** cooperation among **equal partners** of all types of actors forming the food system
- Striving to shape Luxembourg's food system in a more sustainable way, according to **regional**, qualitative, **fair** and **ecological** criteria

Empirical Survey among Participants to a Study Trip to the Food Policy Councils in Bonn and Cologne: Food System Professionals, 2019, N = 51

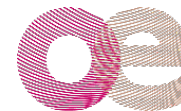

Empirical Survey among Citizens and Food System Professionals interested in Luxembourg's future Food Policy Council:

Citizens and Food System Professionals, 2021, N = 305

Expected insights from those two surveys

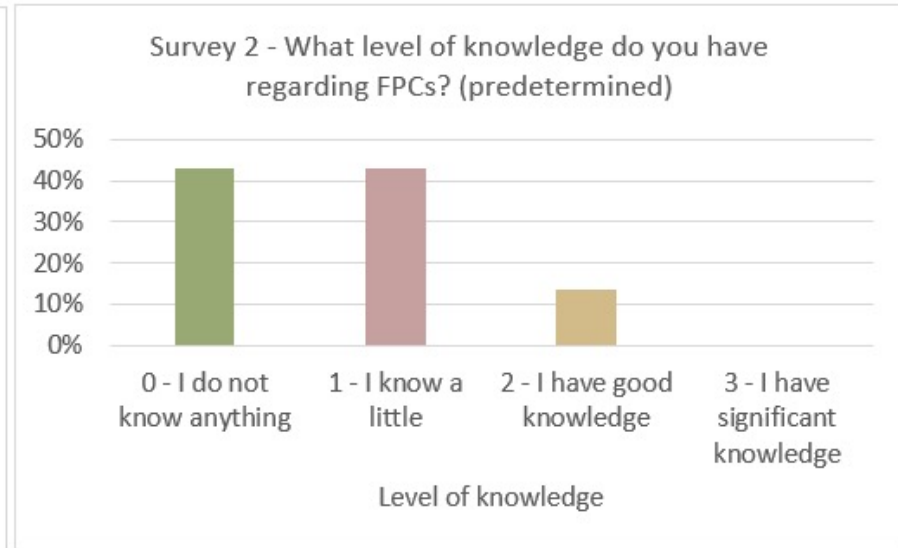

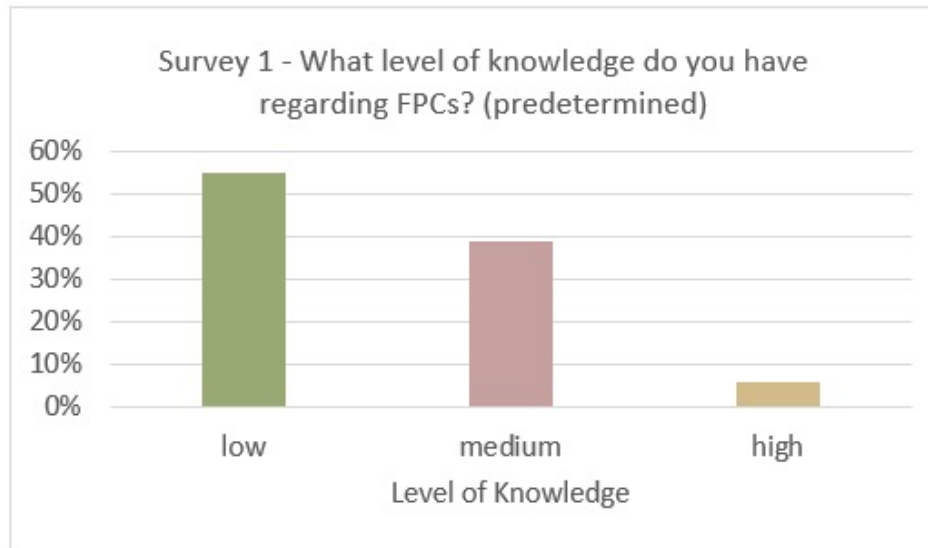

- What Luxembourgish citizens and professionals would like to see a national-scale Food Policy Council accomplish and avoid
- The goals and topics it should address
- Who should be invited to participate
- The knowledge that respondents have about FPCs
- The likelihood of respondents participating
- The pre-existing knowledge about related projects and tools in the Luxembourgish foodscape.

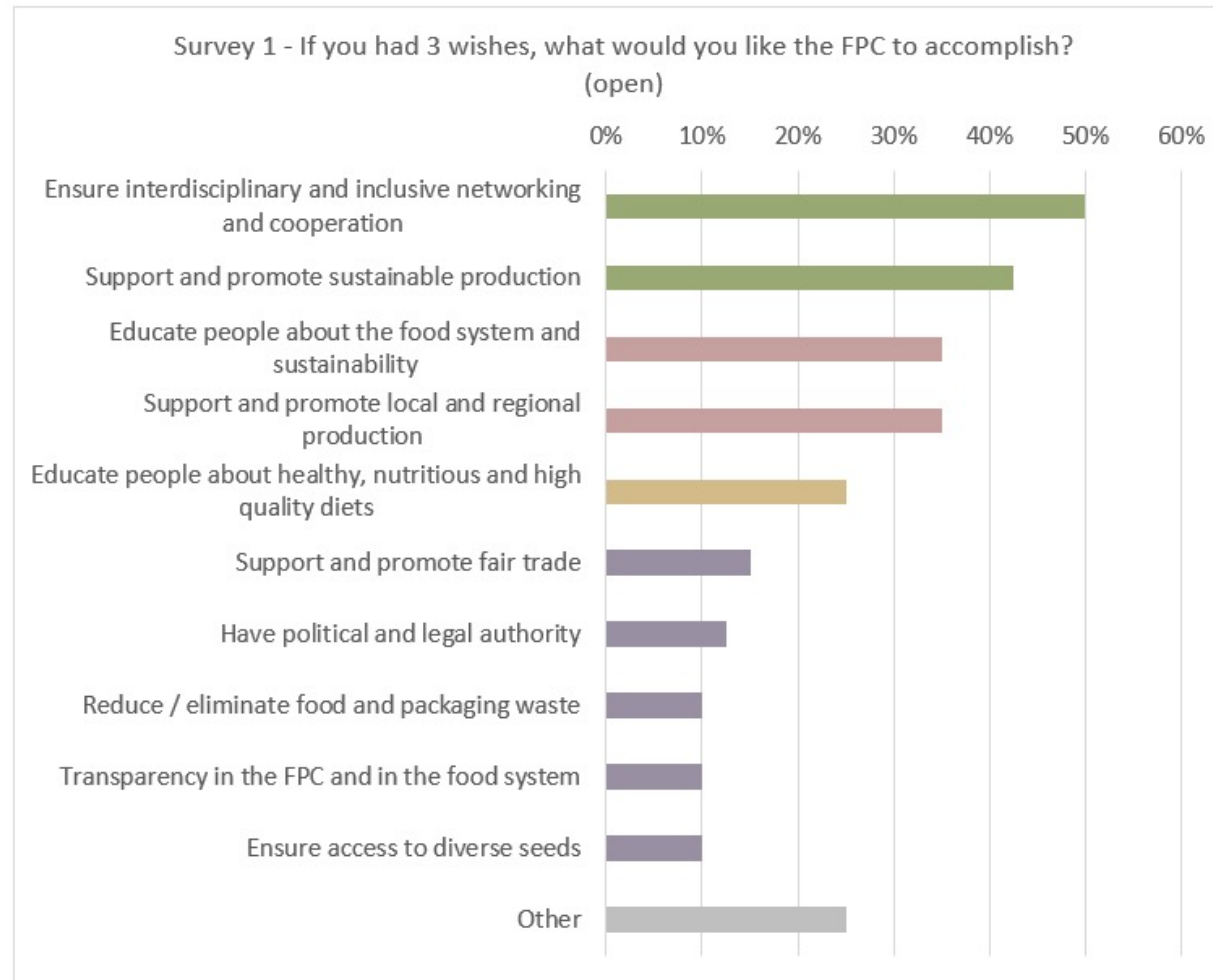

Empirical results of two surveys conducted with citizens and food system professionals

Conclusions of empirical results of two surveys conducted with citizens and food system professionals

Opportunity to

- build multi-stakeholder-led effective food policies
- cooperatively shorten sustainable supply circuits
- encourage innovation, diversification, and collective learning

for a sustainable, resilient and fair food system.

Luxembourg can use its political and economic international weight to push best practices for food sovereignty forward.

Conclusions of empirical results of two surveys conducted with citizens and food system professionals

Achieving food and incidentally climate sovereignty uniting

- governmental action
- business innovations
- civil society initiatives

into collective action, underpinned by systemic ethics.

Food Policy Councils, from local levels to national ones and even an EU one, are key tools for democratic and efficient food system transformation.
